## Abstract of JP2003230568

**PROBLEM TO BE SOLVED:** To provide a treating instrument with ease of handling which is usable without sense of discomfort even when a probe having a treating part asymmetrical to the center axis of the probe is used in various operation processes.

**SOLUTION:** In the ultrasonic treating instrument provided with a tip treating instrument 29, which performs an ultrasonic treatment, at the tip of a vibration transmission member for transmitting ultrasonic vibrations generated by a vibrator for generating ultrasonic vibrations, a weight 41 is provided being positioned between the tip treating instrument 29 and a site where an operator holds the treating instrument to take a weight balance before and after a grip part.
